

CONSCIOUS DATA CENTER FEATURES

- 50,000 sqft available for customized built-to-suite solutions
- 5 MW of critical IT load
- Dedicated Infrastructure options including 2N+2, N+1 and N+2 configurations
- Onsite substation with dual feeds
- Onsite diesel generators
- 20,000 sqft of Class AA office space
- 24x7 managed security with centralized access control systems
- Carrier-neutral facility with many telecommunications and cloud

PATENTED COOLING TECHNOLOGY

Orthogonal Cooling™ is a next generation data center cooling technology patented by our founding members that enables us to operate our data centers in most power-efficient way.

DEDICATED POWER SUBSTATION

We understand the power reliability comes to the forefront when our customers collocate their mission-critical infrastructure with us. Conscious is supported by above-standard electrical capabilities with its dedicated power substation attached to the facility to provide a reliable source of power.

Why Conscious Data Centers?

Conscious Data Centers (“CCDC”) offers customizable colocation facilities to meet client demands for mission critical systems. Our data centers offers 24x7x365 on-site security, monitoring, and customer support with a service level at or exceeding 99.999% uptime.

Location

Sacramento is conveniently located for the high-speed, consistent delivery of critical network connectivity to clients operating nearby or overseas. Our location also offers customers compelling advantages including, being out of earthquake and 2,000 years flood zones, but still within a 2 hours drive of San Francisco and Silicon Valley.

Our offer

CCDC’s data center rivals those of the industry’s leading players, in line with the requirements of Tier 3 data centers. In addition to standard co-location, consider Conscious Data Centers for Primary and Disaster Recovery and Business Continuity Center (DRBC) or to support your need for open area for development lab(s). Our 2N+2 configuration for redundancy with ability to support ultra high densities up to 50kW per rack can be a solid solution.

Carrier Neutral

Conscious operates carrier neutral data centers and our wealth of experience in the industry can aid in freedom of choice and speed of installation with both national and international providers in our facilities.
